

## HARBOUR GATE

This negotiated project comprises of 4 industrial units clad in Kingspan roof and wall panels with contrast colours and details.

Although specified and designed by the architect Gable (UK) Ltd were able to provide our own expertise with regard to many of the junction and interface detailing, including a 'dummy' louver detail which met the architects requirements and provided a cost saving. This was only possible due to our early involvement in the design process.

### Specifications

#### Roof

- Kingspan KS1000 RW Composite Panels
