

KAL-ZIP STANDING SEAM SYSTEM

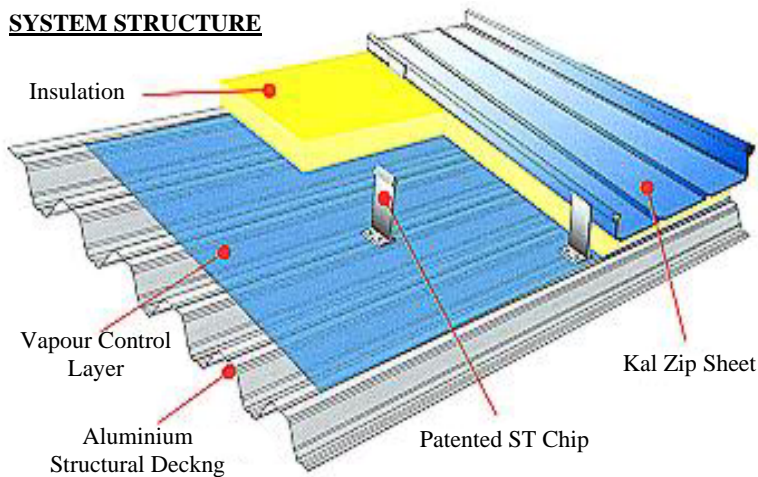

As an approved Team-Kal contractor, Gable (UK) Ltd can offer the complete range of Corus Building Products, in particular the Kal-Zip standing seam roofing system.

More than 70 million sq metres of Kal-Zip have been installed during the past 40 years, making it the worlds leading aluminium standing seam system. It can be used in a broad spectrum of applications from the unusual architecturally demanding structures through to functional industrial buildings.

The systems concealed fixing method means the complete installation forms a smooth, pleasing roof with no exposed fixing to leak, while the standing seam element facilitates the venting of any trapped moisture. Environmentally friendly & fully recyclable, the material is available in a range of finishes & design options, making it truly flexible and ideal for a variety of applications.

SYSTEM STRUCTURE

BENEFITS AT A GLANCE

- Exceptional spanning Capabilities
- Recyclable
- Resists high wind suction pressures
- Flexible design options
- No external drilling
- Wide range of colour, gauge, shape & profile
- Complete selection of accessories & components

The Kal-zip system has now been extended to enable specification to provide solutions to the whole of the external envelope. This can also be utilised to include other Corus products within the group.

It should also be noted that the kal-zip system is fully demountable and can be recycled again and again for only 5% of the original energy consumption with no loss of quality of volume.
