

TEST VALLEY SCHOOL SPORTS HALL

Test Valley School is one of 4 schools which has had a new sports hall built within the last 18 months.

All 4 schools have been designed by Hampshire County Council Architects Department with the intention of creating 'One Design' which could be adapted for each individual school. With this in mind the projects were procured through the supply chain which involved Gable (UK) Ltd negotiating each contract and being involved as early as possible to design out any potential problems and economise on some of the repeat details improving on both price & performance.

With the same 'team' on each contract improvements were made with a consistent quality of work running through each school.

Specifications
